

Safety takes preparation.

In the highly unlikely event of a nuclear accident, a potassium iodide (KI) pill is a key component to keeping you and your family safe. There's no such thing as being too prepared. If you would like more information, please visit **preparetobesafe.ca** or join us for a:

KI Pill Information Session

Thursday, Oct. 22

Pickering Nuclear Information Centre
1675 Montgomery Park Road, Pickering
Between 5 and 9 p.m.

(A station and regulatory update presentation will be made at 7 p.m.)

Keep an eye out for your KI pills in the mail.

*For those living or working within 10km of the Pickering or Darlington Nuclear Stations.
